In this puzzle, the player's task is to eliminate all the Ghouls. During the fight, you will have a distance unit at your disposal, as well as the Alzur's Thunder and Scorch cards. There are several random shots from the arbalists and increase the card. A puzzle in which the player's task is to eliminate the crazy cow. A puzzle in which you have to defeat all the opponents. A puzzle in which you have to eliminate all the tankers and avoid a situation in which one of your soldiers died. This chapter contains ready-made solutions for all the puzzles available in the game of the Thronebreaker: The Witcher Tales. Next Puzzles Aedirn Prev Maps of Hidden Treasures Rivia Next Puzzles Mahakam Previd Lyria
Last Updated: Thursday 15 November 2018 Puzzle Aedirn Prev Maps of Hidden Treasures Rivia in the Thronebreaker: The Witcher Tales Game Area of Lyria, Aedirn, Angren, Mahakam and Rivia. Keep trying if it happens to it. A puzzle in which you have to delete the card by removing all the bodies found on it. By beating them often with some fragments of buttonholes or decent cards, so they are certainly worth it. Here is the solution of the puzzle of Pestilence Corps in Thronebreaker. It is difficult, for sure, and it is more difficult from the fact that the RNG often can be screwed, and you have absolutely no control over this. When there are no cows left on the scoreboard, you will lose the game. Also, you cannot afford a healthy cow to die. In this particular puzzle, you must obtain the strength of all enemy archers up to 1 point. Distribute the seventh arbalista to Melee Riga and the target three body from the left line on Ranged (value 6) Distribute eighth and the last arbalist for Melee Row and Target Corpse fourth from the right on Ranged Row (value 6) Leadership of Meve on Arbalist wounded on the left side of the fray line (value 5). USA MEVE ability on the wounded arbalist paper (value 1) Diploy third arbalist for the range line, target third Corpse to his left (same row) Diploy fourth Arbalist ranged, target the fourth Corpse to his left (same row, value will still be on 6). This will clarify the range line. During the fight, you will have different units at your disposal, as well as the spell Scorch. This will clarify the enemy apples row. This will clarify the enemy at distance line. You may have noticed that the Deathwish of a body card is to damage adjacent cards of 3. During the game, you must command your forces so that you do not accidentally delete one of the opponents. Your task will be to get control over the situation in the city by eliminating all opponents. The Corpse puzzle will charge you to remove all Corpse on board using only your Arbalist cards and Meve's leadership ability. The ability of Meve will also be of help during the fight. During the battle, it is necessary to watch carefully the actions of Wyvern, like every two laps, will devour a cow. Your task is to reduce the health of each opponent at only 1 point. In this puzzle, the task of the player is to eliminate the ancient Foglet. During the fight, it is worth remembering that the boulders will create smaller rock golems, and these will eventually create a more dangerous enemy. What's more, during the fight you can't let Meve die. On each of these maps, you will encounter many puzzles that can be solved specifically. A puzzle where the player's task is to eliminate all the scouts before fleeing. During the fight, you also need to keep an eye on your hero's health points since you can't let Meve die. Your task will be to eliminate your opponent, keeping them unity in life. Thronebreaker: The Witcher Tales has some incredibly difficult puzzles to beat. In this specific chapter, we have prepared solutions for all puzzles you will encounter during your journey through in the Thronebreaker: The Witcher Tales game. That's very important. Deploy fifth Arbalist to right side of melee row, target Corpse on melee row directly above (value 6) Use Meve's leader ability on middle Arbalist on melee row (value 7). As we said earlier, though, sometimes RNG will randomly hit a different card and throw these steps out of kilter. Indeed, the key to this puzzle is taking aim (with your Arbalists) at the right Corpse first, and then timing Meve's leader ability at the right moment. A mourner from Wetterton puzzle which requires you to eliminate a Grave Hag (Mourner). A puzzle, in which the player's task is to force both Fire Golems into the same row and equalize their number of strength points. Amidst the rubble in this puzzle, your task is to eliminate all of the enemies. Here's the order you want to follow: Deploy Arbalist to melee row, target the third Corpse to its left (same row) Deploy second Arbalist to melee row, target the fourth Corpse to its left (same row, value will still be on 6). This will clear the melee row. There you have it. The following solution is how you beat the puzzle, but you might find yourself have to do it a few times until the RNG Gods smile on you. In this puzzle, you must deal with the infected cow carcasses in such a way that none of them explode on your side of the board. The Pestilence Corpse removal puzzle is one you'll come across in Act 2 of the game. That's all you need to know about the Pestilence Corpse puzzle in Thronebreaker. Deploy sixth Arbalist to melee row and target central Corpse on melee row (value 4). The opponent has a special ability that destroys your weakest minion every 2 turns. For more useful guides on the game, search Twinfinite. Your task is to eliminate the threat, namely a Wyvern. Last update: Thursday, November 15, 2018 Next Puzzles Mahakam Prev Puzzles Lyria In this specific chapter, we have prepared the solutions All the puzzles you will encounter during your journey through the territory of Aedirn in The Thronebreaker: The Witcher Tales Game. game.
